**TORNUM<sup>®</sup>**

SCAN AND DISCOVER  
**SIMEZA**

SIMEZA has been manufacturing storage silos for cereals, flour, and other industrial products for more than 45 years. It is one of the pioneering companies in Europe with proven experience in the design, production, and installation of corrugated steel sheet silos for industrial, agricultural and livestock uses.

The storage of grain in cylindrical silos made of corrugated steel sheet guarantees perfect conservation and, together with the specific accessories in our catalogue, also excellent ventilation, and management of the stored material, greatly reducing the factors that degrade or reduce the quality of the grain. SIMEZA silos are designed in a modular way, which means that they can be assembled quickly and easily; in addition, the high-quality standards present in the materials used in their construction make them highly resistant in all types of environments, guaranteeing the long-lasting preservation of all types of grain.

THE 360° SOLUTION FOR YOUR STORAGE is the great value proposal that we have been implementing since 1975. The extensive experience and in-depth knowledge of our team, combined with the quality of raw materials and a desire for constant improvement, make up the DNA of our company, and providing global solutions to our customers is our daily inspiration.

The market is the investor's benchmark, and the steel silo market is always moving towards higher technical specification, larger dimensions, more reliable performance, shorter delivery time and extreme product flexibility regarding customer requirements.

SIMEZA is immersed in a determined process of expansion, with the clear objective of transforming the former family business into a company focused on the international market, able to offer its product and services to customers all over the world.

Thanks to the close collaboration with world leading companies in the field of storage, processing and distribution of grains and seeds, SIMEZA is positioned as one of the companies with the greatest capacity for growth in the near future.

SIMEZA is aimed at companies involved in export and import activities and investors in large grain terminals (inland or port) in the context of international trade.

The scope and operation of these terminals, together with the experience of these inverters, are requiring silos with much more stringent specifications than those of agricultural plants, and a size and design concept that allows high performance, reliability, and easy operation of the installation.

This type of investor is one of SIMEZA's new customer profiles, which is why the company has been investing for years in new human resources, mainly of a technical and commercial profile, in order to correctly satisfy all their needs.

Today, we can find installations produced by SIMEZA in dozens of countries, throughout the five continents (Africa, the Middle East, Russia, South America, Eastern Europe, and East Asia), among many other territories.

---

**Depending on the type of product to be stored, the SIMEZA silo catalogue offers a range of capacities from 8 to 25,000 m3.**

## Products

### Silos

- 4 Flat Bottom Silos FBS 17,60/15

### Steel structures and accessories

- Perimeter ladder
- Vertical ladder and platforms
- Catwalk

## Technical data

Type	FBS
Country	Spain
City	Aldeamayor de San Martín
Customer	Agropecuaria del Centro S.A.
Description	Expansion of the existing plant with a set of 4 flat bottom silos
Product	Wheat
Storage capacity t	13.750
Project partner	PETKUS Spain
Year begin	2021
Year end	2022

## Services

Delivery and supervision of installation of the silo plant and steel structures related to the silo.  
Commissioning.

## Grain Terminal LCC Georgia

Year: 2019

Product: Wheat

Storage capacity: 40.000 t

### Location:

Astara (Georgia)

### Number and type of Silos:

4 Flat Bottom Silos FBS 14,50/16

4 Flat Bottom Silos FBS 21,40/14

2 Flat Bottom Silos FBS 10,70/11

3 Train/Truck Loading Silos TLS 4,60/08/45

### Accessories:

Catwalks, tower, ladders, temperature system, maximum minimum levels, ventilation systems (fans, aeration grids), structure for TLS silos.

### Steel structures and accessories

- Catwalks
- Tower
- Ladders
- Temperature system,
- Maximum minimum levels
- Ventilation systems (fans, aeration grids)
- Structure for TLS silos

## Technical data

Type	FBS + TLS
Country	Georgia
City	Astara
Customer	Grain Terminal LCC
Description	Storage plant located in a logistics hub for the transloading of grains in the Caspian region
Product	Wheat
Storage capacity t	40.000
Project partner	PETKUS Engineering
Year begin	2019
Year end	2021

## Services

Basic and Detail Engineering and design of the general layout and flow-chart of the whole plant.

Design of architectural drawing for the civil works calculation and realization.

Steel structures design and static calculation.

Delivery and installation of the silo plant and steel components.

## AlSahal Group Libya

Year: 2018

Product: Wheat, barely and rice

Storage capacity: 119.500 t

### Location:

Tobrouk, Tripoli and Benghazi (Libya)

### Number and type of Silos:

23 Flat Bottom Silos FBS 22,20/13

20 Truck Loading Silos TLS 4,60/6/45

7 Truck Loading Silos TLS 3,80/5/45

### Accessories:

Vertical ladder and platforms, catwalks, sweep augers and thermometry.
